

Basic Properties of Corrugated Plastic Sheet

- Material	Polypropylene copolymer / High density polyethylene
- Extrusion Die	Twin-wall(2-7mm) / Multi-wall(8-12mm)
- Colors	Standard: Natural, White, Grey, Black Optional: Opaque white, Yellow, Green, Blue, Orange, Tan, Pink, Purple Custom colors are available upon request.
- Thickness	2-12mm
- Weight	250-4500 g/m ²
- Width	Flat sheets: 100-2600mm Rolls: 100-2600mm(<4mm, 750gsm)
- Length	No actual limitations, made to order
- Tolerance	Thickness: ± 0.15 mm Density: $\pm 5\%$ Width: ± 2 mm Length: ± 5 mm
- Recyclability	100% recyclable
- Print ability	Screen printing / Flatbed digital printing / Flexo printing
- Welding ability	Ultrasonic / Hot wind
- Process ability	Die cutting / Rotary cutting / Creasing
- Characteristics	Excellent resistance to water, grease, acids and part of chemical liquids
- Optional Grades	Corona treated UV resistant Anti-static Flame retardant Conductive
- Applications	Sign substrate Protection sheet for transportation Construction form-work Glass bottles & jars layer divider Packaging material
